## EXPERIENCE

---

Agile Defense

Dec 2023 - Oct 2025

### Pega Software Developer

- Design and develop code updates and maintenance to ensure timely delivery of new features and improvements
- Conduct unit and regression testing and write tests to enhance the reliability and quality of the software
- Maintain reporting functionality based on ReactJS using PrimeReact components and development
- Take part in daily and weekly Agile ceremonies such as the daily scrum, sprint pointing, and retrospective
- Execute peer code reviews to resolve bugs, promoting best practices and code quality within the team
- Led a documentation overhaul on Sharepoint for our application to be used for our entire customer base

Agile Defense

Dec 2022 - Dec 2023

### Help Desk Specialist II

- Led the team for seven consecutive months in tickets resolved and positive satisfaction survey responses
- Collaborated with customers to resolve IT requests and resolve application, printer, or computer problems
- Installed and deployed new workstations, mobile phones, and tablets including performing data migration
- Performed software patch upgrades, hardware driver installations, and software updates
- Managed and configured Outlook distribution lists and teleconferencing setup
- Utilized Microsoft Power Apps to create custom application solutions for our customers

Cybrary Inc.

Feb 2021 - Dec 2022

### Senior Customer Experience Associate

- Performed Tier-1 and Tier-2 technical support as the sole overnight customer experience associate providing service order management of all support tickets for 30,000+ active users
- Mentored junior team members and served as the subject matter expert for support escalations and lab tickets
- Created and led live orientations for new customers to introduce them to the Cybrary platform in 2021
- #1 on team for resolved customer support tickets and maintained a 100% satisfaction rating for first half of 2022
